Subject: Corroborating Evidence for Dr Shiva's Statistical Proof Dominion Vote Switching

Dr Shiva' statistical pattern analysis proved the Dominion software used an algorithm to switch votes from Trump to Biden using the weighted rate feature.

You can easily and quickly obtain corroborating hard evidence for Dr. Shiva's statistical pattern proof:

1. Obtain from Dr. Shiva the following information for the most heavily Republican precincts (e.g., top five precincts) in Oakland, Kent, and Macomb Michigan counties:
    a) the votes recorded for Trump, Biden, and each other presidential candidate, b) the votes recorded for each down ballot candidate and their party affiliation, and
    b) Dr. Shiva's estimated number of votes switched from Trump to Biden.
2. Trump team would find the contact information for the person responsible for each of the selected precincts
3. The Trump team would request each responsible precinct person to provide from the raw vote data (e.g., polling tape data) the total ballots cast, and the individual vote totals for Trump, Biden, each other presidential candidate, and each down ballot candidate. The data must not be from any digitally processed records. The responsible people will probably cooperate with you because these precincts are heavily Republican.
4. The Trump team would then reconcile for each precinct the raw vote totals to the recorded vote totals for each candidate. **The difference is hard evidence of vote switching and corroborates Dr. Shiva's statistical pattern proof.**

The hard evidence is a game changer because the Dominion software vote algorithm switched a minimum of 138,000 from Trump to Biden in just these 3 Michigan counties. If the vote-switching algorithm was used in all precincts with Dominion software, a massive number of votes were switched nationwide. Based on this hard evidence, the DOJ would be compelled to launch a large RICO investigation of the criminal conspiracy that planned and carried out this massive election fraud.

Your IT experts can quickly develop a simple computer program to identify precincts throughout the country that used the Dominion software algorithm to switch votes. The software program logic would be:

1. Identify the most Republican precincts in each county for all states.
2. In these precincts, compare the percent vote Trump received to the percent vote the down ballot Republican candidates received.
3. Flag precincts in which the Percent Trump votes is x% less (criterion to be determined) than the percent votes for Republican down ballot candidates

Dr. Shiva and his associates can provide you with the exact logic for the software program.

Another analyst performed Dr. Shiva's statistical pattern analysis on Milwaukee county and determined the same software algorithm was used to switch Trump votes to Biden, resulting in a total reduction of 60,000 for Trump (this analysis must be independently validated). Biden's current vote lead in Wisconsin is 20,000.

I will send evidence to you soon of fraudulent Biden only ballots in Georgia:

- In Georgia, 818 ballots were marked only for President Trump, and 95,801 were marked only for Joe Biden with no votes for other candidates on the ballots. This is a statistical impossibility. A Bernoulli trial statistical analysis calculates the odds of this difference being random are one out of 10 to the power of 274.
- A Computer Science professor, who is an expert in computer security, analyzed the QR codes on Georgia's ballots one week before the election. He proved that a copy of the ballot can be run through Dominion's voting machines and counted as a valid ballot.

The 95,000 Biden-only ballots are fraudulent copies and must not be counted.

The corroborating evidence for Dr. Shiva's statistical pattern proof will result in President Trump winning in Michigan and Wisconsin. The rejected fraudulent Biden-only ballot copies will result in President Trump winning Georgia. This will give President Trump a winning 274 electoral votes.

 President Trump would quickly be declared the election winner once the corroborating evidence is obtained.

Dr. Shiva Ayyadurai, Bennie Smith, and Phil Evans are true American heroes. Their proof that Dominion software switched 138,000 votes in 3 Michigan counties is evidence of large-scale election fraud nationwide. The Democrats would probably have stolen the election from President Trump without this evidence. For this reason, Dr. Shiva Ayyadurai, Bennie Smith, and Phil Evans saved our sacred American

democracy, and saved democracies in all countries that use Dominion software.
